

VB50 Series

APPLICATIONS

This mounting has wide applications, particularly in high temperature, high frequency environments. Unaffected by hydraulic oils, fuels, etc. Its stainless steel construction gives an extremely low magnetic footprint.

DESCRIPTION

The mounting consists of stainless pressings, centre tube and resilient knitted stainless steel pads. Weight approximately 46 g.

CHARACTERISTICS

Load range	= 2.26 – 3.62 kg
Natural Frequency	= 13 to 16 Hz vertical
Transmissibility	= <4:1
